

OMEGA ANALYTICS

CASE STUDY

Problem

Identify 200 acre project site in Bangalore International Airport planning area within a 150 sq km corridor

Solution & Value Proposition

Conventional Survey

Paper maps, field enquiries

2 months, 5 people

2 site options

Omega Analytics

Spatial decision support system from secondary data sources

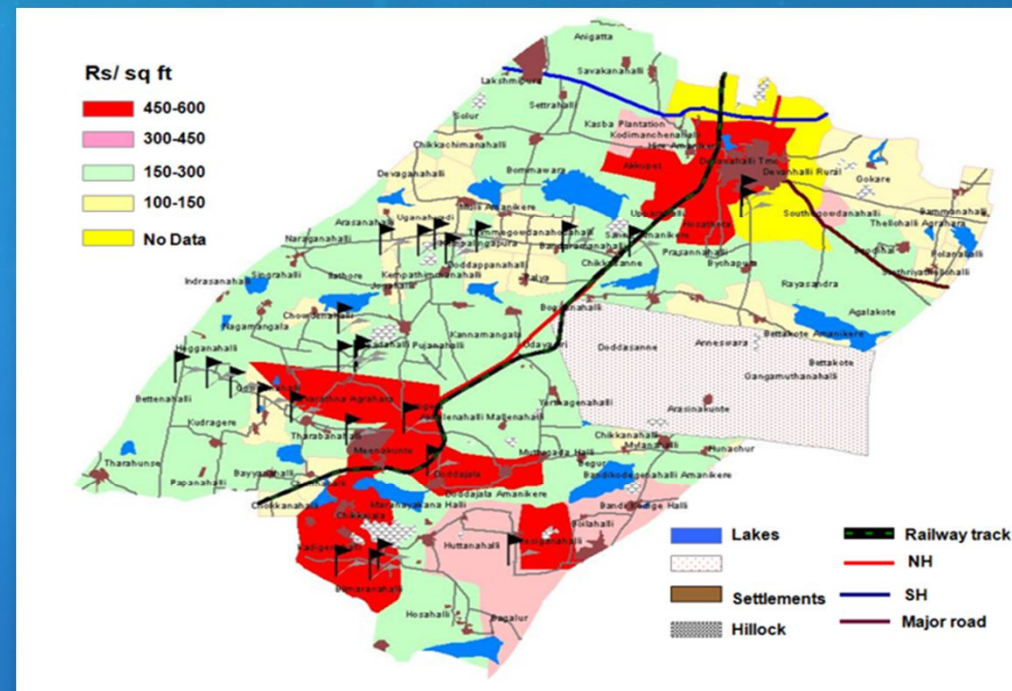

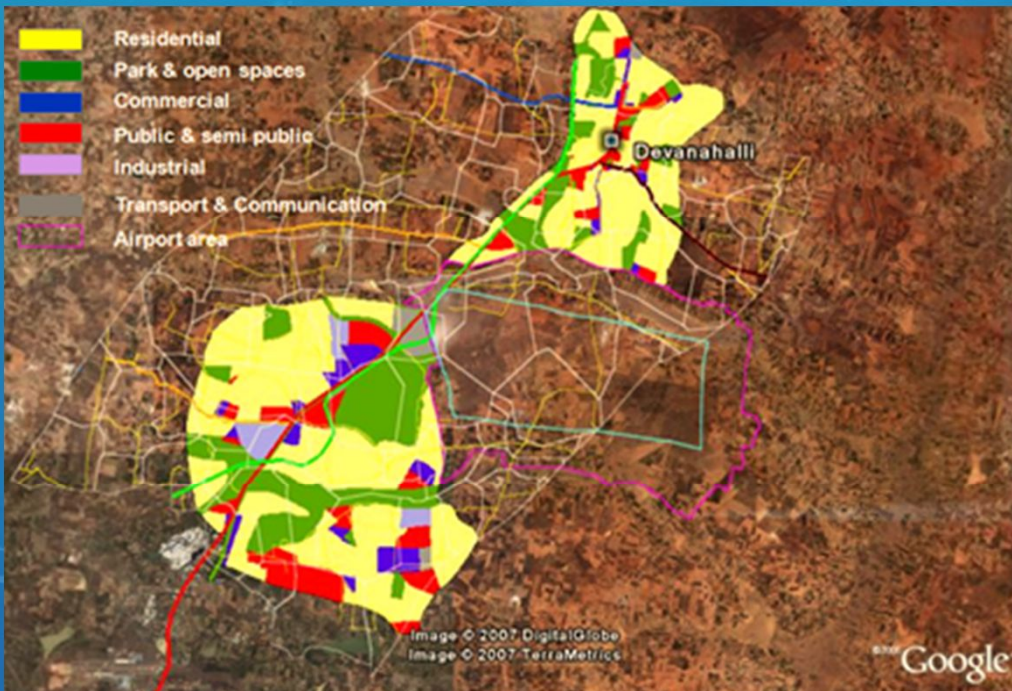

2 weeks, 2 resources

9 site options

What takes months, done in weeks !

Identified **14 km * 10 km** corridor and mapped:

- Nearby villages, road network, settlements
- Landmarks, population, residential projects
- Agricultural land values
- Market value versus guideline value
- Survey number of the villages

SUCCESS STORY

FROM THE CLIENT

"Omega Analytics provided a very innovative GIS based solution to support our planning and decision making process. The project was executed with a high degree of professionalism. The quality of the project deliverables and the ability to meet time schedules was commendable."
